*Paul Christian has over 19 years of experience supervising and managing remedial investigations and remediation projects under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), state underground storage tank (UST) and voluntary cleanup programs.*

*Mr. Christian's current responsibilities include management of the St. John – Mittelhauser St. Louis Regional Office, project management, remediation oversight and management, client interface and contact, data collection and analysis, and report preparation.*

*His remediation experience includes designing, constructing, operating, maintaining and managing multiple remedial technologies including soil vapor extraction (SVE), Dual Phase Extraction (DPE), air sparging, biosparging, and groundwater recovery and treatment systems. He has also managed and provided oversight for several emergency response programs for different clients in the petroleum refining, aviation, telecommunications, and rail industry.*

*Mr. Christian has interfaced with regulatory agencies on behalf of clients, prepared work plans and reports, and successfully obtained regulatory closure for numerous sites through the Illinois EPA Site Remediation Program (SRP) and the Leaking Underground Storage Tank (LUST) Program.*
