Michael A. Johnson has 26 years of experience working as part of a team or individually on numerous remedial design and remedial action projects, innovative technology evaluations, site investigations, feasibility studies, RCRA facility and site inspections, multimedia environmental audits, data collection projects, field sampling activities and regulatory compliance evaluations. In addition, Mr. Johnson has participated in waste treatability studies, involving both laboratory and field work, in support of programs to correct water and industrial solid waste pollution problems. He has demonstrated his verbal and written skills in preparing over 300 technical reports and making over 40 presentations to clients and regulatory authorities.
