

ST. JOHN - MITTELHAUSER & ASSOCIATES

## Daniel J. Lombardi, PG

### Principal Hydrogeologist

M.S., Geology, 1986  
Northern Illinois University,  
DeKalb, IL

B.S., Geology, 1982  
Illinois State University,  
Normal, Illinois

Certified Professional Geologist,  
American Institute of Professional  
Geologists, No. 9497

Professional Geologist,  
State of Illinois, No. 196-000222  
State of Minnesota, No. 30597  
State of Wisconsin, No. 381

Registered Geologist,  
State of Missouri, No. 0250

*Mr. Lombardi has over 20 years of experience supervising and managing remedial investigations and remediation projects under Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), state underground storage tank (UST) and voluntary cleanup programs.*

*His responsibilities include senior level technical support and QA/QC, peer review, project management, personnel supervision, remediation oversight and management, drilling supervision and management, project scoping, data collection and analysis, and report preparation. He has an extensive background in geology/hydrogeology, specializing in subsurface investigations, delineation of contaminant plumes, aquifer testing and groundwater modeling. He has successfully completed several modeling projects using a variety of software programs including MODFLOW, MT3D, PATH3D, AT123D, SESOIL, and performed spatial data analysis using SURFER and various other 3D-Visualization programs.*

*His remediation experience includes designing, constructing, operating, maintaining and managing several remedial technologies including soil vapor extraction (SVE), air sparging, dual-phase extraction (DPE), free-product recovery, metal fixation, bioventing, biotreatment and groundwater recovery and treatment systems. He has performed risk-based closures for aviation sites and several chemical and manufacturing facilities, and developed the scope of work and managed facility demolition projects. He has managed and provided oversight for several emergency response actions involving petroleum spills, UST systems, aviation disasters and transportation-related incidents.*

*Mr. Lombardi currently serves as Principal Hydrogeologist in the Chicago Regional office for St. John-Mittlehauser & Associates.*
